

What is claimed is:

1. A method for mitigating the presence of scales on an infant's scalp caused by cradle cap comprising the sequential steps of:
  - a) loosening said scales by massaging a pre-treatment composition into said scalp of an infant;
  - b) using a scale-removing device to remove said scales from said scalp;
  - c) cleaning said scalp by using a shampoo; and
  - d) applying a moisturizer to said scalp,wherein said pre-treatment composition, said scale-removing device, said shampoo and said moisturizer are included in a single secondary package.
2. The method of Claim 1, wherein said pre-treatment composition comprises an oil material.
3. The method of Claim 2, wherein said oil material is mineral oil.
4. The method of Claim 3, wherein said oil material is gelled mineral oil.
5. The method of Claim 1, wherein said scale-removing device is a comb.
6. The method of Claim 1, wherein said moisturizer further comprises a butter.
7. The method of Claim 1, wherein said moisturizer has a viscosity from about 9,000 to about 14,000 cps as measured by a RVT viscometer with a TA spindle and rotating at 10 rpm.
8. A kit for mitigating the effects of cradle cap on the scalp of an infant comprising:
  - a) a secondary package containing at least four components that comprise a pre-treatment composition;
  - b) a scale-removing device;
  - c) a shampoo; and
  - d) a moisturizer,

wherein said pre-treatment composition, said shampoo and said moisturizer are each individually packaged in a primary package.

9. The kit of Claim 8, further comprising instructions to perform the method of Claim 1.
10. The kit of Claim 8, wherein said pre-treatment composition comprises an oil material.
- 5 11. The kit of Claim 8, wherein said oil material is a mineral oil.
12. The kit of Claim 11, wherein said oil material is a gelled mineral oil.
13. The kit of Claim 8, wherein said scale-removing device is a comb.
14. The kit of Claim 8, wherein said moisturizer further comprises a butter.
15. The kit of Claim 8, wherein said moisturizer has a viscosity from about 9,000 to about  
10 14,000 cps as measured by a RVT viscometer with a TA spindle and rotating at 10 rpm.
16. The kit of Claim 8, wherein said primary packaging is a carton.
